Isn't it great when things just click...

You know the correct fixing force* is applied when the TAPER-LOC® tool 'clicks' the glass into place.

The TAPER-LOC® System is the simple way to install glass railings and balustrades†.

Patents No. 8,122,654 and 8,201,366

*Nm †For toughened/toughened laminated glass from 12mm-25.52mm thick

WELCOME TO THE NEW LOOK GLASS SHOWCASE

Welcome to the first issue for 2013. As always the showcase is packed full of popular Glass and Glazing products at discounted prices. Our 'seriously low prices' pull out in the middle of the showcase is worth a look. Also this quarter we have special prices on U-Channels for Shower Doors and Commercial Glazing applications, Mirror Extrusions, and Bulk Buy offers on Glass Cleaner and Gunther Mirror adhesive, plus many more offers.

As part of the CRL group we have over 55,000 products in our range, sold across the globe. In this and future issues we will be tailoring a selection of these products in our 'Expand Your Range' feature. We hope you may see an opportunity to complete a new or different type of project using these products.

I hope you find the showcase of interest, if there is a product you can't find or you have technical enquiry please get in touch (see 'Meet the Team' below). We are continually looking to improve how we do things and the CRL customer experience. If you have a suggestion and/or feedback it is most welcome.

Finally, I wish you a very successful 2013 and look forward to catching up with you in our Spring issue out on the 1st of April.

Regards

Simon Boockock
Managing Director, C.R. Laurence of Europe

glass PRODUCT SHOWCASE

Glass Product Showcase is published by C.R. Laurence of Europe. Winter special offer prices valid from 1st January to 31st March 2013. All prices in Pounds Sterling and do not include VAT. All products F.O.B. CRL Service Center. Prices subject to change without notice.

6K NOT LIKE OTHER GLASS COATINGS!

We are proud to bring to the market a new surface protection system specifically designed to protect both Glass and Stainless Steel.

6K by CRL is a two-step surface protection treatment with a 3 year protection lifespan. 6K uses Nano technology and provides a hydrophobic, water repellent Nano coating. These hydro- and oleo phobic effects make it difficult for particles of contamination such as grease and dirt to adhere, and allows them to be easily removed without applying abrasive agents, giving the 'Easy-clean' effect.

Easily applied in two stages to give a 3 year protection lifespan, 6K also provides great value for money. A 1 Litre bottle will cover approximately 100m², offering almost four times the coverage of alternative synthetic polymer silicones.

6K isn't like other glass coatings, it's a natural silica dioxide based solution. Silica dioxide is most commonly found in nature as sand or quartz and not to be confused with the synthetic polymer silicone. Silicon dioxide based 6K provides several benefits in comparison with synthetic silicone products. 6K provides longevity; its UV-stability enables functionality for a number of years, approximately the lifetime of the coated surface, whereas synthetic polymer silicone products are damaged slowly by sunlight. 6K creates a permanent chemical bond with the substrate and enables excellent abrasion resistance. Synthetic polymer silicone can be easily removed by abrasion. 6K provides chemical stability and is resistant to almost all standard household and industrial cleaners with the exception of alkali. Many synthetic polymer silicones must be reapplied after cleaning the surface.

Chris Pepper, Marketing Manager for CRL commented:

6K is a quality product that offers great value and versatility. Designed primarily to give complete protection to both Glass and Stainless Steel it is ideal for combined glass and stainless steel installations like canopies, balustrades and railings, like those used in our TAPER-LOC system. 6K can also be used on cladding, quartz surfaces, and glazed ceramic surfaces such as tiles, toilets and sinks, making it an ideal solution for a bathroom environment.

6K is applied in two easy colour coded stages, Pre-clean (red) and Protect (blue). Pre-Clean is applied using a specifically designed red cloth to ensure an ideal clean surface in preparation for 6K Protect application.

Protection for: Glass • Stainless Steel • Shower Screens • Railings • Canopies • Cladding • Glazed Ceramic Tiles

CRL 6K PRE-CLEAN SOLUTION

- Stage one - pre-clean
- Thoroughly cleans glass or stainless steel ready for the protection stage
- Ideal for showers screens and glass railings
- Recommended for use with the CRL Pre-Cleaning Cloth (red)
- Dries streak-free
- Conforms to EN 45001

FROM ONLY £7.50*

SALE PRICE EACH (INC. 10% DISCOUNT)

CAT. NO.	CONTENTS	1	6
PC6100	1000ml	£21.90	£19.49

6K6100	1000ml	100m²	£81.30	£73.90
6K6050	500ml	50m²	£48.30	£43.49
6K6025	250ml	25m²	£30.25	£26.90

*Minimum order: 1 each.

NEW

6K Protect is effortlessly applied with a blue cloth using 2 – 3 trigger sprays per 0.25m², and is easily polished into the surface until clear. Immediately after the application of 6K Protect, the nanoparticles form a strong bond with the surface in a chemical reaction. After only a few minutes the water spray test will show good droplet formation. After about 24 hours the reaction is completed and the coating is fully durable. Even before completion of the reaction 6K Protect can be touched and can come into contact with moisture immediately after coating. After application, if a glass cleaner is to be used on the surface, a non-Silicone based cleaner must be used. CRL AC6050 Cleaner is recommended.
