Sliding Doors

CRL280 Series Top Hung Sliding Door System

- Sleek design
- No notches or holes required in the glass for installation
- Designed for use with 8 to 10mm toughened glass
- 3m top track and fixed glass channel
- Rated for doors weighing up to 80kg and 1.5m wide plus a fixed glass panel

The new CRL280 series Top Hung Sliding Door System is truly the most versatile system of its kind. There are six different kits to choose from, offering configurations with or without fixed panels, and the ability to mount either to the wall, ceiling or glass panels.

The CRL280 System has no bottom track, so a tripping hazard is eliminated, and the smooth sliding action allows for finger touch control. The upper clamp and roller assemblies have a fine tune adjustment feature allowing for openings and floors that are not true and level. Each kit comes with concealed stops in the top track to hold the door open or closed.

Kits are available in a satin anodised finish, with a special order option to clad or powder paint in any architectural finish desired.

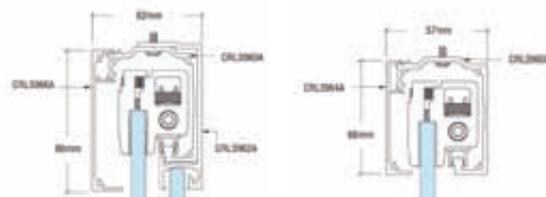

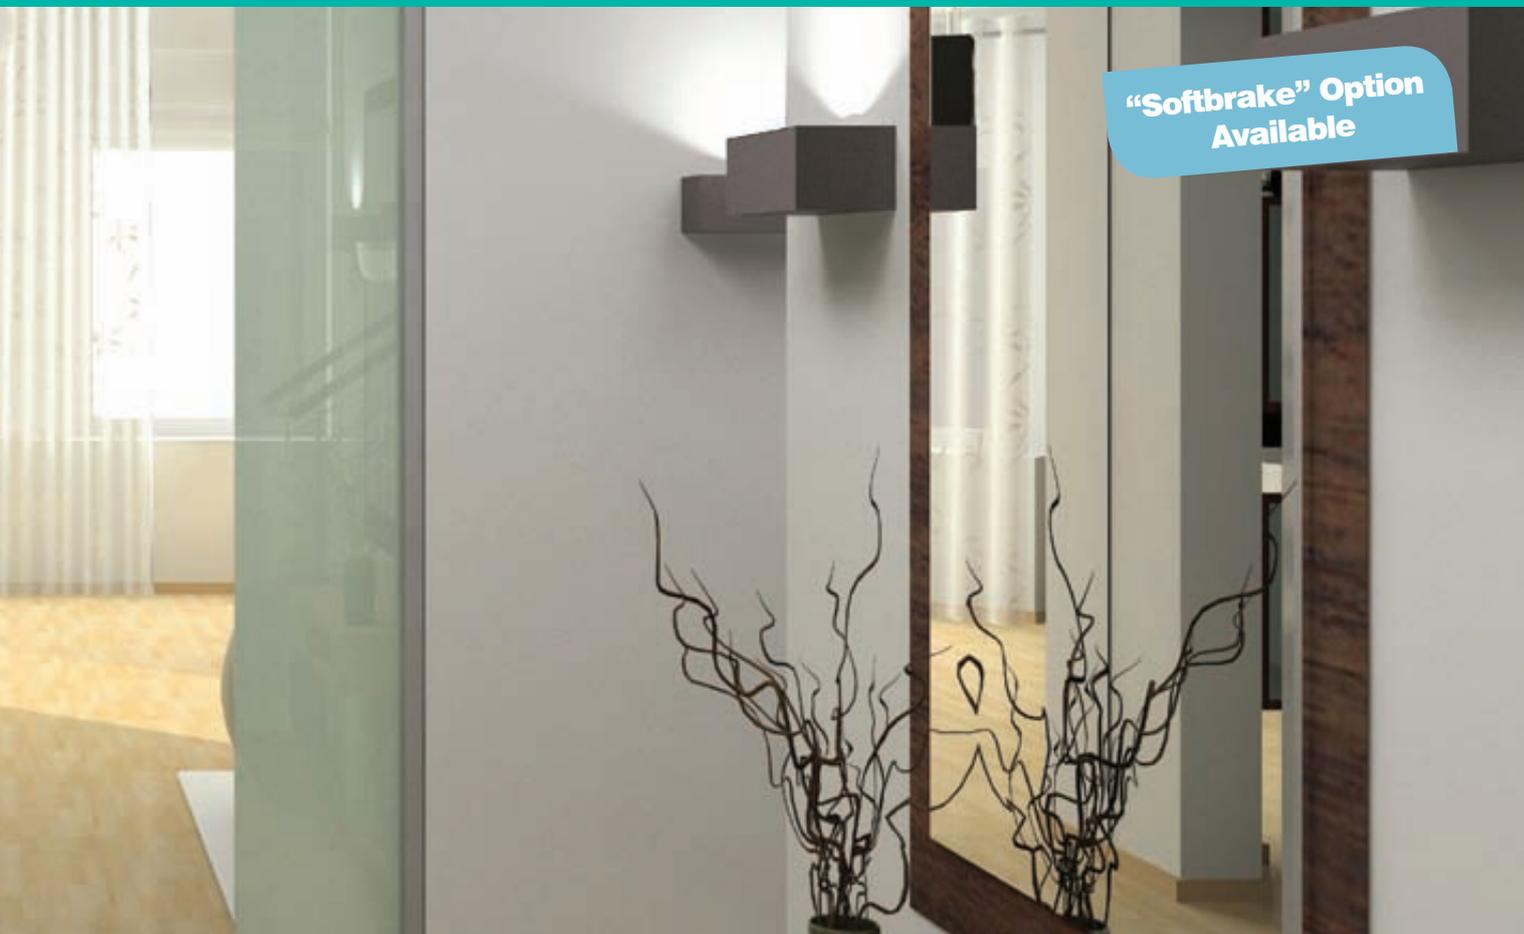

NOTE: Laminated glass should not be used with the CRL280 System.

SALE PRICE EACH (INC. 10% DISCOUNT)

CAT. NO.	DESCRIPTION	1	6
CRL2810F	Single sliding door with fixed panel wall or ceiling mount installation	£368.90	£338.15

Minimum order: 1 each. Kits contain stock lengths of Top Track measuring 3m in length and therefore must ship common carrier. Kits can be combined for quantity pricing.

CRL50 Series Top Hung Sliding Door Systems

- Models available for single doors, synchronized doors, and telescoping doors; wall or ceiling mount
- For use with 8 to 10mm toughened glass
- No notches or holes required in the glass
- Can accommodate doors weighing up to 80kg
- Kit contains all necessary hardware to complete installation

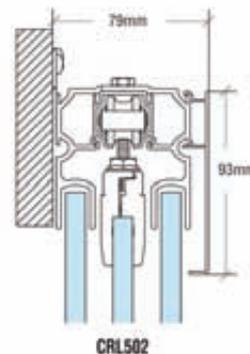

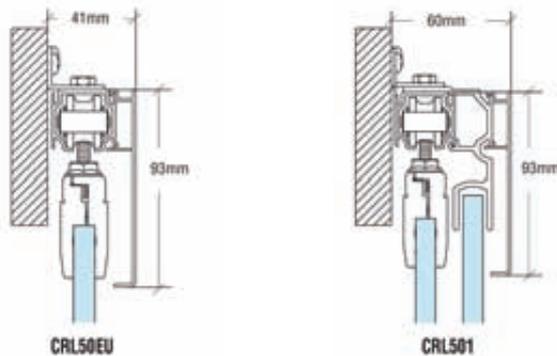

The new CRL50 Series Top Hung Sliding Door Systems feature a sleek design that offers options for wall or ceiling mount for sliding glass doors with or without fixed panels. These top hung systems require no bottom track and the smooth sliding action allows for finger touch control.

The upper clamp and roller assemblies offer 6mm of height adjustment during installation to allow for openings and floors that are not true and level. Kits come with concealed roller stops in the top track to hold the door in the open or closed position, a small bottom guide, and are available in a satin anodised finish with an option for powder paint or cladding in any architectural finish desired.

CRL50 Systems are also available with optional 'synchronization' of bi-parting doors where the operation of one panel moves the others. A 'telescoping' option is also available where the panels slide in the same direction and stack away together. You can also enjoy the best of both with our combination 'synchronized' and 'telescoping' options all in one.

Contact Customer Service for assistance with proper kit selection or installation instruction assistance.

NOTE: Laminated glass should not be used with the CRL50 System.

Softbrake Option Available

- Single glass doors mounting to walls

SALE PRICE EACH (INC. 10% DISCOUNT)

CAT. NO.	DESCRIPTION	1	6
CRL50EU	Single sliding door	£304.95	£279.45

OTHER FINISHES AND TECHNICAL INFORMATION AVAILABLE AT crlaurence.co.uk

Essence Series Sliding Shower Door System

NEW

- Headerless system offers frameless look both vertically and horizontally
- Bottom rolling system has integrated height adjustment
- Rollers include anti-derail/anti-pinch guard
- Water management with use of clear vertical jamb and bottom track
- Stocked in four popular finishes
- For use with 12mm thick toughened safety glass (glass not included)
- Also available with a header

Plumbing Fixture Not Included

CRL has taken the Frameless Sliding System to a new level. Our NEW Essence Series allows a headerless appearance by utilising a bottom rolling system that includes an anti-derail/anti-pinch guard feature. The bottom rollers also have an integrated height adjustment for door to vertical jamb alignment. By being completely header-free, a frameless vertical and horizontal appearance is achieved. Smooth and quiet operation of the door is the cornerstone of this bottom rolling unit.

At the same time, excellent water management is accomplished at the sill via the bottom track and vertically with the use of a clear L-shape jamb having a soft seal/bumper.

With your separate addition of a free standing shower head and valves, new configurations are possible, such as beautiful island designs, U-shaped designs, and L-shaped designs with unconventionally placed plumbing walls.

Sold in a Basic Kit that allows both 180 degree and 90 degree installations, the user simply orders the necessary Brackets, and Handle or Knob separately to complete the installation. See the important **HOW TO ORDER** section at the bottom right of this page.

The Essence Series Frameless Sliding Shower Door System is for use only with 12mm thick toughened safety glass. It is stocked in four popular finishes.

ESS1
Rounded
Roller Style

ESS3
Square
Corner Roller Style

BASIC ESS1 OR ESS3 SERIES KITS INCLUDE THE FOLLOWING:

CRL ARS Aluminium Railing Systems

CRL 200 Series Railing System

Our 200 Series Railing System uses a continuous flat top rail, which helps achieve a modern look. This system can be used with glass, or picket infills. The pickets in this system come in the form of a Picket Panel, which saves time and labour during installation.

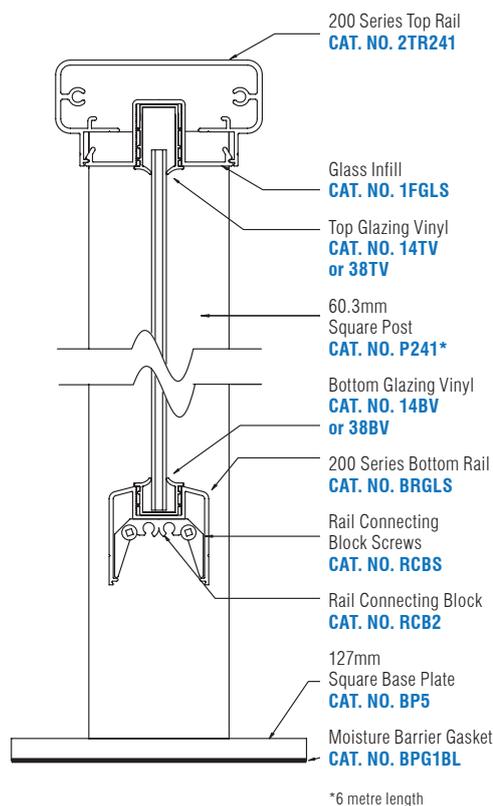

- 6005-T5 aluminium alloy
- Standard rail heights are 914, 1066 and 1219mm. Custom rail heights also available
- 60.3mm square aluminium post, alternate configurations available
- Infill panel options: 6 or 10mm glass, 19mm square or round profile aluminium picket panels, stainless steel cable, or decorative cast panels
- Also 12mm glass when used with wet glaze method
- Three standard colours available from stock, with custom colours available
- Deck (top) mount or fascia mount applications available
- Core mount applications also available
- Can be fabricated with custom gates
- Exterior and interior applications
- A.D.A. compliant guard rails

TAPER-LOC[®] 'X'

Install glass balustrades with ease...

- 50% faster to install than traditional alternatives
- Dry glaze system, no need for cement
- Tested to meet the strictest building code requirements BS6180:1999, BS6399-1:1996 and AbZ
- The product is completely unique because it uses a horizontal TAPER-LOC® 'X' design, which allows the system to be adjusted, dismantled and re-set
- Ideal for replacing scratched and broken panels in existing applications

For more information visit taper-loc.co.uk

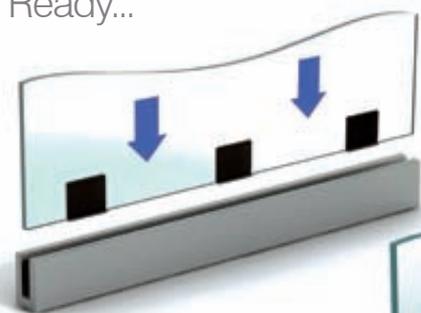

NOTE: The System includes an Installation/Removal Tool and CRL TAPER-LOC® Tapers for 12mm, 15mm, and 19mm toughened monolithic glass applications, and 13.52mm, 17.52mm, 21.52mm, and 25.52mm laminated toughened glass. Unique because they use a horizontal taper lock design, TAPER-LOC® Tapers are simply installed with CRL's exclusive TLK9/12 Installation/Removal Tool.

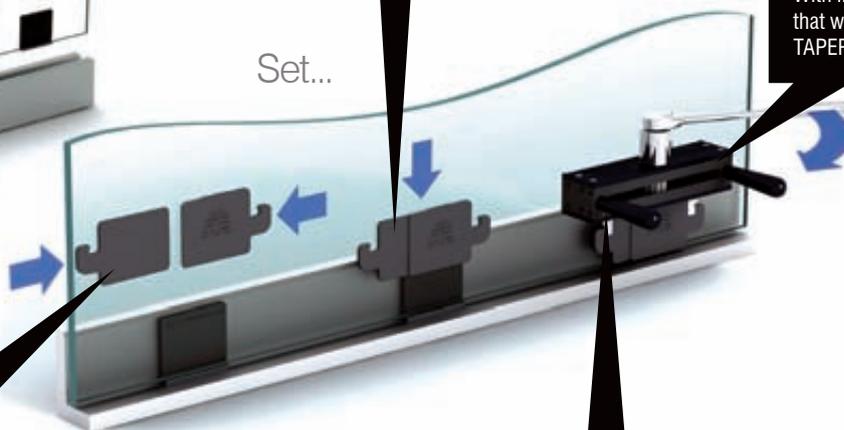

TAPER-LOC® U.S. Patent Number 8,122,654

Ready...

Set...

TAPER-LOC® Tapers insert into the Base Shoe every 350mm Centre-to-Centre.
