NEW - CRL Posiglaze

FAST INSTALLATION

Designed to be installed without the need of ensuring the fitting surface is totally level.

FULLY ADJUSTABLE AFTER INSTALLATION

Posiglaze uses a unique, simple adjustment system allowing horizontal alignment of each glass panel.

LIGHT WEIGHT AND EXTREMELY STRONG

Cleverly designed out of extruded aluminium, saving weight yet keeping strength. We anodise our system increasing protection against the elements.

GLASS THICKNESSES

- 12 mm, 15 mm and 19 mm toughened monolithic glass
- 13.52 mm, 17.52 mm and 21.52 mm toughened laminated glass

EXCELLENTLY ENGINEERED

Our system is tested & engineered to meet the strictest building regulations (with the appropriate fixing and glass thickness) in both domestic and commercial installations as per BSI standard 6180:2011.

EASY TO INSTALL,
EASY TO ADJUST

STEP 1

Fit the base channel (D1) to the substructure.

STEP 2

Clip the glass slip clamps (D2) to the bottom edge of the glass panel (We provide different sized clamps for different glass thicknesses).

Place the bolt screws in the pivot clamp (D3).

STEP 3

Position the glass in the channel. Using the adjustment bolts, loosening one side and tightening the other. This will allow the alignment of the glass with the adjacent panel and enable vertical alignment of the glass.

STEP 4

Attach the cover strip (D4) and bead gasket to complete the installation.

Introducing CRL Spig-Lite Pro

Tested to BS6180:2011 to achieve 0.74 KN loading required for residential and small commercial applications.

ONLY 2 SPIGOTS & FIXINGS REQUIRED PER METRE

Extremely quick to install, elongated holes to allow for easy alignment.

NO NEED TO DRILL THE GLASS

Our glass clamping mechanism removes the need to hold the glass with locking pins.

NO DRAINAGE ISSUES

Raises the glass to 32 mm above the floor level which produces natural drainage

USES THE SAME PROVEN ADJUSTMENT SYSTEM AS POSIGLAZE

Horizontal alignment of each glass panel, ensuring the top edge of the glass is equal.

GLASS THICKNESSES

- 12 mm and 15 mm toughened monolithic glass
- 21.52 mm toughened laminated glass

EASY TO INSTALL
AND ADJUST

STEP 1

Bolt the spigots to the substrate (Only 2 spigots required per metre).

STEP 2

Firmly squeeze the clamps around the glass and lower into the Spigots.

STEP 3

Thread the bolt in the clamp bar and position them within the moulded clamp area. Adjust and lock the glass in position by undoing the screw.

STEP 4

Slip the gasket in the top recess of the top bead. Apply adhesive to the top bead and place on the Spigot.
