- Used to create the very basic profile before using your position 1 diamond wheel
- Preserves the life of your diamond tools
- Maintains the quality of the polishing tools at the end of the sequence
- For use on granite or quartz
- For use with CNC machines only
- Diameter: 130 mm
- Bore: 35 mm, Suitable for surfaces of 20, 30 and 40 mm thickness
- RPM Min-Max: 4500
- Feed Speed U/min: 800-1000

CRL ADI 'Y' Profile Pre-Cutting Wheel for Granite or Quartz

Cat. No. 43PB122640

- Used to create the very basic profile before using your position 1 diamond wheel
- Preserves the life of your diamond tools
- Maintains the quality of the polishing tools at the end of the sequence
- For use on granite or quartz
- For use with CNC machines only
- Diameter: 120 mm

- RPM Min-Max: 4500
- Feed Speed U/min: 800-1000

CRL ADI 'Tilt Wheels' for Producing Built Up Edges - Interlocking Profiles - Ultra High Speed

- Allows a CNC machine to create the 45 degree mitre needed for built up edges that would normally have to be done on a bridge saw

  The main benefits of using these tools instead of the bridge saw are as follows:

  Accuracy - The CNC will cut straight and accurately, unlike a bridge saw which can sometimes run offcourse due to the blades' natural flex.

  Less Chipping - Bridge saw blades tend to chip the material, especially some granites. These tools will give a much better finish with very little chipping which means only a very small chamfer is required when the pieces have been assembled. Bigger chamfers that are often needed following a bridge saw cut will expose the joint line, therefore creating a less professional finish.
- Stock removal: to shape
- RPM Min-Max: 4500-5500
- Feed Speed U/min: 800-1200

CRL Cleaning Products

By means of intensive research and development, our comprehensive range of products is continually being improved and extended. The very high quality level of CRL and AKEMI® products is ensured by up-to-date production and filling plants and continual inspection and testing.

Engineered Stone

Artificial stone consists of pieces of natural stone which are bound together by means of synthetic resin or cement. Examples of cement-bound artificial stone are concrete ashlar or terrazzo. Examples of resin-bound artificial stone are quartz, ceramic and porcelain.

Natural Stone

In the case of natural stone, a distinction must be made between hard and soft rock. The hard types of rock include granite, gneiss, quartzite, and porphyry. The soft types of rock include sandstone, limestone, marble (Thassos, Carrara, Estremoz, Palisandro etc.), Jurassic marble, Solnhofer stone, Travertine, Botticino, and Trani.

Sensitivity to Acids

Particular kinds of natural stone consist mainly of calcium carbonate and are called limestone. Limestone, for example marble, is sensitive to acids. Cement-bound artificial stones, such as concrete ashlar, are also acid-sensitive. This is the reason why wine or fruit juice must be removed from the surface of the stone immediately. We strongly advise you to avoid using acidic cleaning agents for these kinds of stone.

About CRL Quartz

With more than twenty years of experience in the stone industry, CRL Stone has developed a comprehensive range of beautiful, engineered quartz surfaces, created to meet the demands of modern living. Hard wearing and easy to care for, CRL Quartz is ideal for the kitchen and bathroom where durability and flexible design are paramount.

CRL Quartz is scratch, heat and stain resistant. Unlike natural materials such as marble, CRL Quartz never needs to be sealed. Requiring minimum maintenance to keep it looking as good as new, the non-porous surface makes cleaning simple, with soap and water or a mild detergent is all that is needed.

Offering a versatile design solution appropriate for any setting, CRL Quartz is available in a large range of colours, with a polished or honed finish. In thicknesses of 20mm and 30mm, the surface comes in an extra-large slab format, allowing for greater consistency in design over large spaces such as kitchen worktops.

CRL Quartz comes with a 25-year warranty for added peace of mind.

Features & Advantages

Resistant to Wear & Tear

Thanks to CRL Quartz technical characteristics, this is one of the most resistant worktop on the market, ideal for use in the kitchen and the bathroom.

Highly Scratch Resistant

Food can be cut directly on top of the surface without it being damaged. Even so, adapted cutting boards should be used for cutting.

Stain Resistant

CRL Quartz is not affected by products like solvents, detergents, bleach, oil, vinegar or citrus juice, provided that the stains are cleaned away within 24 hours.

Heat Resistant

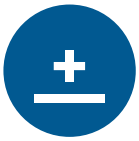
It does not burn or give off smoke or toxic substances when exposed to high temperatures.

Impact Resistant

CRL Quartz has a high resistance to knocks and impacts.

Easy to Clean & Care For

No extra care or special products are needed to clean it. Stains can be removed with water or mild cleaning products.



Hygiene

Because it is a non-porous surface, the build-up of bacteria or mould is prevented, and food can be placed in direct contact with it.

25-Year Warranty

Visit **crlquartz.co.uk** to register your surface and activate your warranty.

About Ceralsio ceramic

Ceralsio is a beautiful, hard-wearing and versatile range of ceramic surfaces, built for the demands of modern living.

Thanks to its lack of pores, it is completely impermeable and highly stain resistant. Its many benefits also include a strong resistant to wear and tear, scratch and heat. As a very hard material it is suitable for kitchen and bathroom countertops, flooring and wall-cladding. Its colour and texture remain unchanged even when Ceralsio is used outdoors, since it can withstand the effects of ultra-violet rays without its surface appearance being altered in any way.

Ceralsio has been developed by using the lightest grade of ceramic materials the selection and fusion of the purest of minerals, compacted at a force of 4,000 kg/m^2 and sintered at temperatures of over 1200°C. The highly innovative manufacturing process creates unique, unrepeatable finishes, thanks to the use of the high-precision "Full Digital" printing system.

Thanks to its properties, Ceralsio guarantees versatile, eco-friendly, innovative surfaces that help to make life easier and more convenient.

Ceralsio comes with a 10-year warranty for added peace of mind.

Hygiene

Because it is a non-porous surface, the build-up of bacteria or mould is prevented, and food can be placed in direct contact with it.

Resistant to frost and ice

Its low water absorption rate of less than 0.2% makes it ideal for outdoor environments where frost and ice is common.

Resistant to ultra-violet rays

Ceralsio surfaces are colourfast despite the passing of time, even when used outdoors.

Heat resistant

It does not burn or give off smoke or toxic substances when exposed to high temperatures. Hot cooking utensils like frying pans or saucepans can be rested on its surface without it being damaged.

Bending strength

It can withstand a high weight without bending or becoming deformed, with the entire surface remaining flat.

Impact resistant

Ceralsio has a high resistance to knocks and impacts by everyday objects or utensils. (Everyday objects found in kitchens, restaurants, laboratories etc).

10 Year Warranty
